

## WEB CAMPUS MANEGMENT SYSTEM

### Introduction:

The WEB CAMPUS describes the activities of the college, where Administrator, Faculty, Student and Parent are its users, can be used by college manager to web host and for corporate mailing. The activities are currently carried out manually. The existing system of college portal has a number of activities like; Problems reported by the students, parents are intern problem reported to Administrator. To find the status of the problem.

## Description of net college management system:

College Portal Management System, functionality has been divided into 3 main modules, they are

- **Administrator**
- **Faculty**
- **Student**

The screenshot displays the netCMS College Management Software interface. On the left, there is a sidebar with the netCMS logo and three user role descriptions:

- Student / Parent**: can view the Attendance, Marks Profile of Student, Faculty, Administrator.
- Faculty**: can view the Assigned classes, Subjects, Profile of Student, Faculty, Administrator.
- Administrator**: can view the Profile of Student, Faculty, Administrator. And can Assign classes and Subjects To faculties.

The main content area features a login form with the following elements:

- Instruction: Enter your Login ID, Password and click on submit Button
- Form title: LOGIN
- Input fields: USER ID and PASSWORD
- Submit button: SUBMIT
- Link: Only New Student [Sign Up](#)
- Exit button: Exit

At the bottom, the version information is displayed: NetCMS V1.1.0 © copyright all rights reserved for [SHRUTI Software Pvt.Ltd.](#)

## Administrator:

The screenshot displays the netOVS College Management Software interface. On the left, three user roles are listed with their respective capabilities:

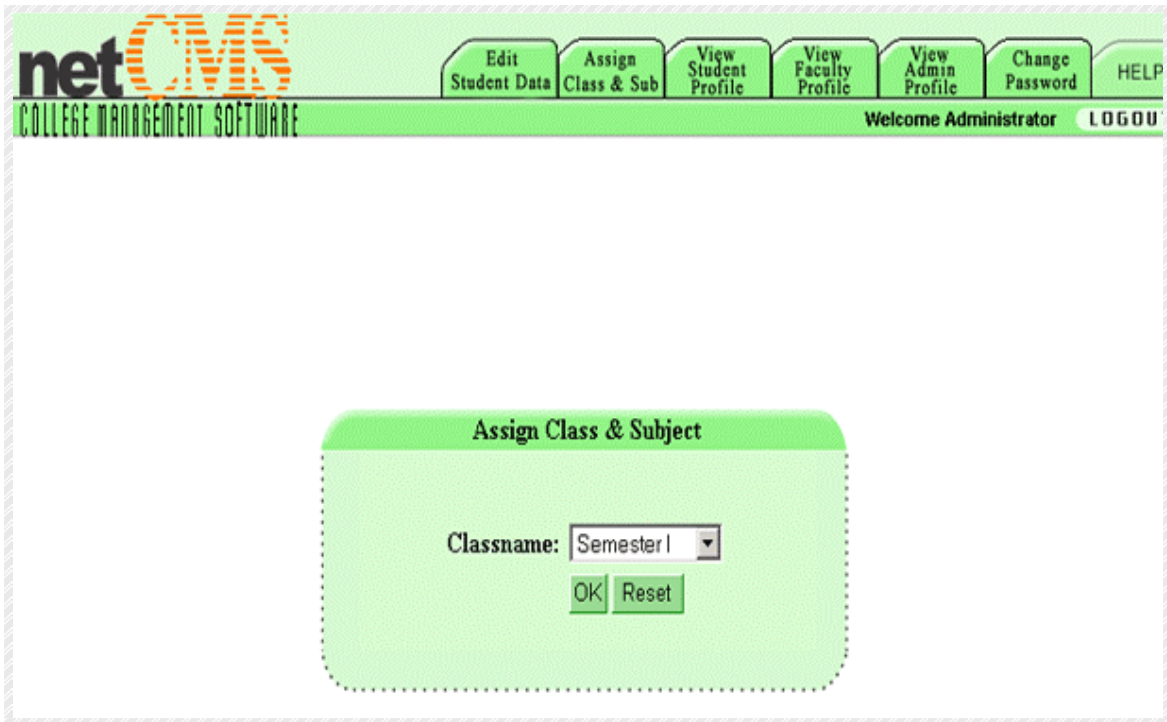

- Student / Parent**: can view the Attendance, Marks Profile of Student, Faculty, Administrator.
- Faculty**: can view the Assigned classes, Subjects, Profile of Student, Faculty, Administrator.
- Administrator**: can view the Profile of Student, Faculty, Administrator. And can Assign classes and Subjects To faculties.

On the right, a login form is shown with the following fields and buttons:

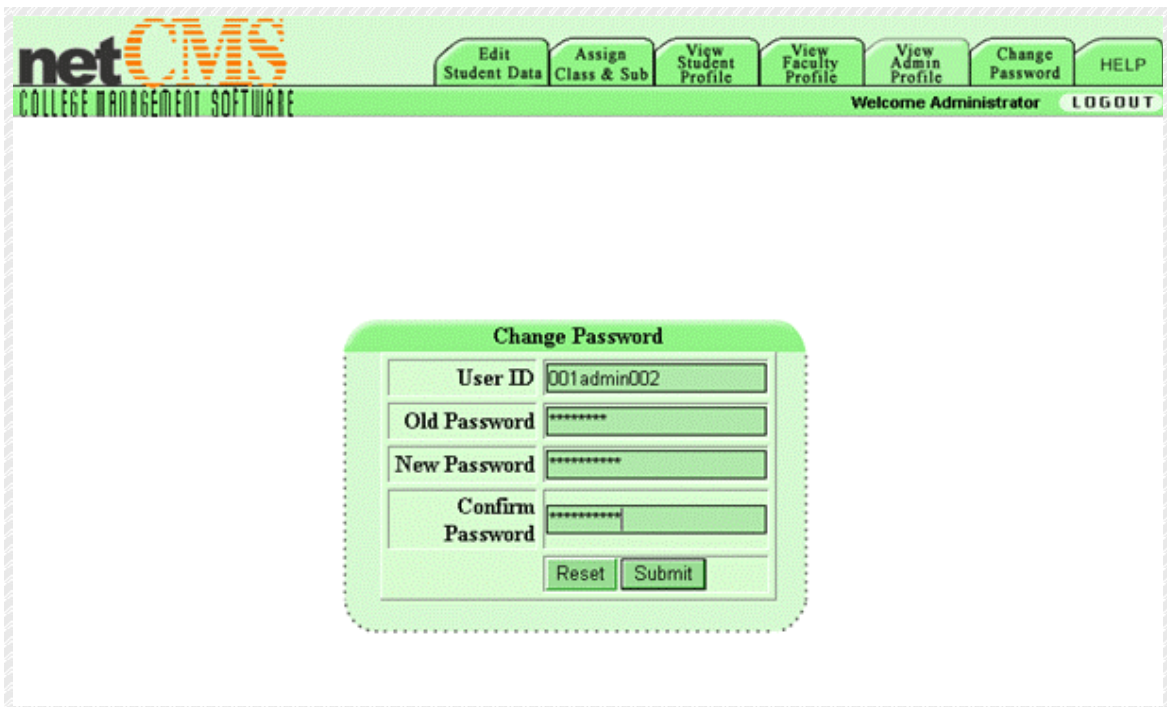

- Instruction: Enter your Login ID, Password and click on submit Button
- Field: **USER ID** (containing 'administrator')
- Field: **PASSWORD** (containing 'administrator')
- Button: **SUBMIT**
- Link: Only New Student [Sign up](#)
- Button: **Exit**

The system administrator is a wide base roll and is a super user of the system. The responsibilities of the system Administrator includes:

1. Maintain day-to-day operations of the system.
2. Creation of the users (actors) of the system including the course administrator.
3. Assign the subjects and classes to the faculties
4. (Registering the students) editing the student details.

Here Administrator can assign the class and subject to each faculty.

Here Administrator can change the password, view the student profile, faculty profile, and Administrator profile. And also edit the student Profile.

## Faculty:

The requirements are detailed and is divided as

- Object modeling
- Dynamic modeling
- Functional modeling

The design is also an important part of any software product. The database design is normalized and the data is safe. In the data table design the student table is the parent table, and all the other tables like guardian, address1, address2 etc are the child table. Using the regno (student) we can get all the information of the student, like as we get the details of marks, attendance etc.

## PERSONAL DETAILS

First Name: Jayashree  
Father Name: Hanamantappa  
Last Name: Telkur
